

I support XM and urge our lawmakers to reject the NAB's petition 04-160. My only wish is that Nashville would be added to the list of city's that have their own traffic channel! The ability to get the informaiton I need when I need it would be a great addition to local radio...unfortunately people don't understand that Radio is in the business of running commercials...they just use informaiton and music to attract you to listen to them...
